NUMBER 1

U.S.S.R. HONOUR ISSUE

V. I. Ferronsky	V	Editorial
P. I. Chalov and **A. I. Tikhonov**	1	Application of the natural fractionation of ^{234}U and ^{238}U in studying underground-water dynamics under active water exchange conditions
V. V. Romanov and **L. S. Vlasova**	17	Investigation of water exchange processes in seas and lakes with the use of tritium
V. Lujanas	33	Cosmogenic radionuclides in investigations of some atmospheric processes
R. Vaikmäe	45	Isotope variations in the temperate glaciers of the Eurasian Arctic
Yu. A. Karpychev	57	Fluctuations of the Caspian Sea level as an indicator of global climatic changes—using data from radiocarbon dating of sediments
V. S. Brezgunov	71	Study of water exchange in sea–river water mixing zones using the isotopic composition–salinity diagram
A. D. Esikov	79	Isotope hydrology of some hydrothermal systems of the Kurilo-Kamchatskay volcanic region
Kh. G. Kikichev, V. I. Kostyukovsky, M. V. Sanin, L. A. Shevtsov and **B. I. Shkarin**	91	Assessment of evaporation off the surface of the Sarykamysh Lake from radioisotope data
B. V. Karasev	99	Fast-moving migration components: theory and experiment
V. G. Onufriev, S. A. Denisik and **V. I. Ferronsky**	111	Baricentric models in isotope studies of natural waters
V. V. Gudzenko, V. M. Shestopalov and **E. V. Sobotovich**	119	The isotopic studies of subsurface water protection from radioactive pollution in the areas of nuclear power plant siting
L. S. Vlasova and **V. V. Romanov**	125	Formation of groundwater and river waters on the basis of tritium analysis
A. D. Esikov and **V. I. Pashkina**	135	A study of the process of joint formation of methane gas-hydrate and authigenic carbonates in bottom sediments in the Sea of Okhotsk

NUMBER 2

J. A. Czubek	143	Rock neutron parameters—I. Neutron slowing-down parameters
Yu. N. Burmistenko and **B. E. Lukhminsky**	169	The Monte Carlo method in mining nuclear geophysics—1. The application of neutron generators
A. Boufraqech and **K. M. Dede**	183	Some problems in evaluating pulsed neutron experiments on non-moderating media
C. W. Tittle	193	POROSITY: an improved porosity code for the CNL for desk-top computers

Yu. N. Burmistenko and B. E. Lukhminsky — 205 Modelling of spontaneous neutron logging characteristics

A. E. Pillay, J. I. W. Watterson and A. H. Andeweg — 209 A pool type irradiation facility for a ^{252}Cf neutron source

M. J. Millen, P. T. Rafter, B. D. Sowerby, M. T. Rainbow and L. Jelenich — 215 Plant trial of a fast neutron and gamma-ray transmission gauge for the on-belt determination of moisture in lump coke

A.-M. Jepsen, I. Lerche and R. O. Thomsen — 227 Effects of lamellae size distributions from $^{40}Ar/^{39}Ar$ on sedimentary thermo-chronology in the San Joaquin Basin

G. T. Cook, P. Naysmith, R. Anderson and D. D. Harkness — 241 Performance optimization of the Packard 2000 CA/LL liquid scintillation counter for ^{14}C dating

A. Starzec — 247 Geostatistical estimation of zinc grade in samples of drill cores

K. Wattananikorn, P. Asnachinda and S. Lamphunphong — 253 Uranium exploration in the vicinity of abandoned fluorite mines, in northern Thailand, using cellulose nitrate films

S. S. Raghuwanshi and S. G. Tewari — 259 Implementation of the inverse distance weighting technique for airborne radiometric data

P. S. Dhami, R. M. Agrawal, B. L. Jangida and M. Sundaresan — 271 Quantitative analysis of zirconium, hafnium, yttrium and thorium in zircons using energy dispersive x-ray fluorescence spectrometry

R. C. Ramola, M. Singh, A. S. Sandhu, S. Singh and H. S. Virk — 275 The use of radon as an earthquake precursor

K. Wattananikorn and T. Sri-unyu — 289 Seasonal variation of radon in dwellings in an area close to uraniferous fluorite veins in northern Thailand

NUMBER 3

J. A. Czubek — 293 Rock neutron parameters—II. Thermal neutron parameters

A. F. Hastings — 305 Log derived elemental concentrations to improve the accuracy of fluid saturations determined from well logs

M. T. Rainbow — 321 Monte Carlo simulation of a coal ash gauge

N. G. Cutmore, P. E. Hartley, B. D. Sowerby and J. S. Watt — 333 On-line analysis in the Australian coal and mineral industry

A. J. Desbarats and P. G. Killeen — 343 A least-squares inversion approach to stripping in gamma-ray spectral logging

L.-P. Cui — 353 Radiometric methods in regional radon hazard mapping

A. Starzec, M. Lankosz and L. Szostek — 365 An automated energy dispersive (EDXRF) analyzer

H. K. Sharma, H. S. Binarh, V. K. Mittal and H. S. Sahota — 371 Prospecting for silver in ground water

A. Z. Hussein, R. A. M. Rizk, N. F. Soliman and N. B. Rofail — 377 Experimental determination of gamma-ray detection efficiency for a system of cylindrical sources and a 100 cm^3 HPGe detector

A. E. Pillay and R. C. M. Mboweni 383 The application of x-ray spectrometry to isotopic-source activation analysis of dysprosium and holmium

R. A. M. Rizk, K. Verghese and R. P. Gardner 389 A model for continuous on-stream neutron activation analysis

Announcement i

NUMBER 4

G. L. Mathis and C. W. Tittle 397 Three-dimensional neutron diffusion theory within a borehole environment

D. A. Kozhevnikov and I. Ph. Khathmullin 413 A method of geometrical factors in the theory and interpretation of formation density logging

V. A. Velizhanin, I. G. Dyadkin, F. Kh. Enikeeva, B. K. Zhuravlyov, B. E. Lukhminsky and R. T. Khamatdinov 425 Monte Carlo simulation in nuclear geophysics—1. Features of Monte Carlo algorithmic techniques for solving problems in borehole nuclear geophysics

A. I. Khisamutdinov and A. F. Voronin 437 Spatial distribution of the epithermal neutron flux from a ^{252}Cf source in a "borehole-formation" system

J. L. Pinault 443 Some comparisons of spectral responses of neutron–gamma logging tools between the MOCA Monte Carlo code and experimental results

R. J. de Meijer, H. M. E. Lesscher, R. D. Schuiling and M. E. Elburg 455 Estimate of the heavy mineral content in sand and its provenance by radiometric methods

J. L. Carroll and I. Lerche 461 A cautionary note on the use of $^{87}Sr/^{86}Sr$ sediment ages in stratigraphy studies

Rama and W. S. Moore 467 Submicronic porosity in common minerals and emanation of radon

Rama and W. S. Moore 475 Micro-crystallinity in radioactive minerals

M. Singh, R. C. Ramola, S. Singh and H. S. Virk 479 Influence of moisture content on radon diffusion in soil

S. A. Raoof and N. A. R. Al-Sughayiar 483 Determination of trace elements in coastal waters by energy dispersive x-ray fluorescence spectrometry

I. Pluta, I. Tomza and T. Pluta 489 Determination of ^{238}U and ^{234}U isotopes in water by liquid scintillation counting

J. E. Glynn and R. l. Grasty 493 Counting statistics: is anything really there?

R. Heaton, H. Lee, P. Skensved and B. C. Robertson 499 Alpha-induced neutron activity in materials

R. A. M. Rizk and A. Z. Hussein 511 A rapid elemental analysis of fluids based on cyclic neutron activation analysis using a low-level isotopic neutron source
